

The Dark Arts of Coproduction

Join us to explore together different ways to mix generative AI, art, climate change narratives and ethnographic research to help create the dark arts of coproduction toolkit.

If you want to participate, bring a small narrative of no more than 130 words about your research. In the workshop we will codesign a card for the new toolkit that portrays your research interest and graphically explores your main interests, questions and research/policy/action challenges.

Workshop lead
Ernesto Schwartz Marin
GSI Assistant Director for
Coproduction
