

# 100% RPET SMALL BOTTLES IN GB

1

We're moving to 100% recycled plastic on all on-the-go sized bottles of 500ml or less in GB. Bottles will carry new labels notifying consumers of the change and encouraging them to recycle the bottle.

2

The move covers our entire portfolio of brands including Coca-Cola Original Taste, Coca-Cola Zero Sugar, Diet Coke, Fanta, Sprite, Dr Pepper and Lilt. GLACEAU Smartwater 600ml and 850ml are already made from 100% recycled plastic.

3

Increasing the amount of recycled plastic in smaller bottles from 50% - 100%. This change is another step on our journey towards 100% recycled or renewable plastic in all our bottles, and the creation of a circular economy for our PET packaging.

4

Saving 29,000 tonnes of virgin plastic each year – the equivalent of 2,292 London buses. Bottles remain 100% recyclable and will start appearing on shelves in September.
